CHRISTIAN GRAY  
355 PLEASANT GROVE RD  
YATESVILLE, GA 31097

Customer ID: **41534**  
Certificate: **57-C-0308**  
Site: 001  
CHRISTIAN GRAY

Type: RE-LICENSE INSPECTION  
Date: 24-MAR-2022

---

### 2.75(b)(1)

#### **Records: Dealers and exhibitors.**

The acquisition information for 7 zebus, 1 zebra and 1 capuchin were not documented. Without records which fully disclose the animal's acquisition information, legal and medical information traceback is not possible. Make, keep and maintain records or forms which fully and correctly disclose the required information for acquisition and disposition of animals. The records shall include any offspring born of any animal while in his or her possession or under his or her control. To be corrected by March 21, 2022.

### 3.78(d)

#### **Outdoor housing facilities.**

The facility currently houses 2 capuchins in outdoor housing. The perimeter fence surrounding the primary enclosure is 5 feet tall on 3 sides and 4 feet in the back therefore not meeting the 6 feet requirement for non-human primates. A perimeter fence of sufficient height is important to protect non-human primates by restricting the access of unauthorized humans and animals. The facility must ensure that capuchins being housed outdoors are enclosed by a 6-foot perimeter fence at least 3 feet in distance from the primary enclosures. To be corrected by April 7, 2022.

### 3.84(b)(3)

#### **Cleaning, sanitization, housekeeping, and pest control.**

**Received by Title:** Licensee

**Date:**  
25-MAR-2022

## Inspection Report

---

The facility cleans the capuchins' water and food bowls daily with dawn dish detergent but does not sanitize the containers at least once every 2 weeks. When food and water containers are not sanitized adequately, there is a higher risk of large numbers of harmful germs remaining on the surfaces which creates a health hazard for the non-human primates. Food and water receptacles for non-human primates shall be sanitized by washing them with hot water (180 °F.) and soap or detergent as in a mechanical cage washer, or by washing all soiled surfaces with a detergent solution followed by a safe and effective disinfectant, or by cleaning all soiled surfaces with live steam under pressure. Correct by March 31, 2022.

This is a 1st Relicense Inspection for a Class "C" license. The inspection and exit briefing were conducted with the Applicant.

All items must be in compliance within 2 more inspections or by May 25, 2022, or the Applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Relicense Inspection.

Regulated activity can continue under your existing USDA license until it expires.
