PARTY ANIMALS INC

Type: FOCUSED INSPECTION

Date: 13-DEC-2023

3.127(d)

Repeat

Facilities, outdoor.

No additional perimeter fencing has been added since the last inspection of the fencing. The facility has hired a fencer to do the work but it has not yet been completed. The current enclosure housing the two coatimundi is composed of chain link panels on all four sides, top and bottom. It is not enclosed by a perimeter fence of at least six feet in height and three feet in distance from the primary enclosure fence. The enclosures housing the wallaby and kangaroos are surrounded by the 6 foot perimeter fence on three sides but only by a four foot high fence on the fourth side.

A perimeter fence is necessary to keep out unauthorized animals and persons and to act as a secondary containment fence if the animals were to get out. The facility shall build a secondary or perimeter fence for the exotic species at least six feet in height and three feet in distance from the primary enclosure.

This inspection and exit interview were conducted with the licensee.
