ADEPT DIESEL SERVICE

Type: ROUTINE INSPECTION

Date: 01-AUG-2016

3.31(a)(1) REPEAT

SANITATION.

Cleaning and sanitation of primary enclosures. There is a buildup of dirt and grime on the back side of the 40 wire enclosures, drain board, and on the rear support metal frames for the guinea pig breeders on the east side of the building. Inadequate cleaning and sanitation exposes the animals to potential disease hazards such as bacteria, fungal, and viral diseases. Primary enclosures must be cleaned often enough to prevent an accumulation of excreta, dirt and grime and must be sanitized at least once every 2 weeks. Correct by ensuring that all primary enclosures are kept clean to prevent an accumulation of dirt and grime and that enclosures are sanitized at least once every 2 weeks.

An exit briefing was conducted with the licensee.
