3.125(c)

Facilities, general.

RSC : Sacks of feed are stored on pallets underneath an open shed . One of the bags is torn and spilled feed is on the ground adjacent to the feed bags. Flies are swarming on the spilled feed. The spilled feed is creating an attractant for pests that may contaminate the feed. Storing feed sacks in a shed open to the weather allows for damage to the feed supply by rain. Feed must be properly stored to prevent deterioration and the area surrounding the stored feed kept clean to avoid contamination by pests .

CORRECT BY : 7/12/21

This inspection and exit briefing were conducted with the attending veterinarian .
