

## Inspection Report

Angie Hales  
4333 Valley Road  
Meridian, MS 39307

Customer ID: **44365**  
Certificate: **65-C-0553**  
Site: 001  
ANGIE HALES

Type: ROUTINE INSPECTION  
Date: 10-OCT-2014

### 3.125(a)

#### FACILITIES, GENERAL.

\*\*\*There were two calves that were found in the enclosure with the alpaca. They had gotten out of their enclosure with the cow. The paneling had spaces wide enough on three sides of their enclosure for them to squeeze through which means they could easily escape from their pen. The enclosure needs to be reinforced or constructed to properly contain the animals so they can't escape. Correct immediately.

### 3.130

#### WATERING.

\*\*\*The two small water buckets for the pigs, sheep and goats were empty in their shared primary enclosure. Several animals were continuously approachig the water buckets looking for water. There were too many animals in that enclosure to share two small buckets of water overnight. There should be more water available to the animals for everyone to access it. Correct immediately.

### 3.131(c)

#### SANITATION.

\*\*\*In the pens containing the sheep, goats and pigs were several strands of baling twine on the ground. This could cause injury to the animals if they get entangled in the twine or if they ingest it. Accumulations of trash shall be placed in designated areas and removed from the animal's pens. Correct immediately.

The inspection and exit briefing was conducted with the owner.

The inspection was conducted at the Queen City Fair in Meridian, MS.
