OUTDOOR HOUSING FACILITIES.

(d) Perimeter fence.

***** At time of inspection the enclosures for the two groups of Lemurs did not have a perimeter fence of at least 6' in height.

A perimeter fence needs to be constructed for these two groups that will protect the nonhuman primates by restricting unauthorized humans, and animals the size of dogs, skunks, and raccoons from going through it or under it and having contact with the nonhuman primates.

This fence should be of sufficient distance to prevent contact between the animals inside the fence and outside the fence. Less than 3' ft. in distance must be approved by the Administrator.

This fence will help to ensure the safety and health of both the public and animals from becoming at risk by direct contact between those animals inside the enclosures and those animals and humans outside the enclosure.

TO BE CORRECTED BY: 9/5/14

This inspection and exit interview conducted by USDA, APHIS, ANIMAL CARE Inspector and the Owner.
