

## Inspection Report

Glenn Miller  
2691 Evergreen Dr  
Bird In Hand, PA 17505

Customer ID: **40614**  
Certificate: **23-C-0276**  
Site: 001  
GLENN MILLER

Type: ROUTINE INSPECTION  
Date: 04-APR-2016

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The written program of veterinary care (PVC) on file is incomplete. Ivermectin is listed for internal parasite control for the goats, but does not list the type of ivermectin, concentration, dosage, frequency, or route of administration. The licensee must ensure that he has adequate guidance from the attending veterinarian on all medications and treatments including the name of the drug, concentration, dosage, frequency and route of administration. The PVC must be complete to provide adequate guidance to the licensee to maintain the health of the animals. The type of ivermectin, concentration, dosage, frequency, and route of administration, must be listed on the PVC to ensure the animals receive proper care. To be corrected by April 14, 2016.

### 3.125(a)

#### FACILITIES, GENERAL.

Structural strength. There are least five sections along the fence where the galvanized wire is broken, protruding inwards, and/or detached from the PVC post and rail fence. All animals must have enclosures that are structurally sound and maintained in good repair to protect the animals from injury and to prevent escape. Facilities must establish a maintenance program to keep enclosures in good repair. The galvanized fence must be repaired, removed, or replaced to prevent injury to the goats and to contain them securely. Correct by May 4, 2016.

An exit briefing was conducted with the store manager.
