Facilities, general.

Multiple enclosures are in need of repair:

- One female tiger enclosure had two posts that showed extensive wear. Both posts had roughly 50% of their thickness chewed or clawed away.
- The levated feeding platform in one bobcat enclosure has rotted through on one end

Enclosures that are not maintained in good repair can pose a threat of injury or fail to contain the animals securely.

The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

This inspection and exit interview were conducted with facility representatives.
