Customer ID: **331587**
Certificate: **42-C-0219**
Site: 001

FAIRVIEW ZOOLOGICAL FARM, INC.

Type: ROUTINE INSPECTION
Date: 02-DEC-2015

3.127(b)

FACILITIES, OUTDOOR.

One fawn fallow deer located outdoors near the enclosure housing raccoons does not have access to shelter. Not having access to shelter does not ensure the animal is protected from inclement weather. The licensee must ensure all animals have access to natural or artificial shelter appropriate to the local climatic conditions for the species housed outdoors.

To be corrected by: December 9, 2015.

3.127(c)

FACILITIES, OUTDOOR.

An outdoor enclosure containing a male water buffalo, at least five goats and two fallow deer has standing water puddles on the east side surrounding the food and water receptacles. In order to access the food and water receptacles the hoofstock has to walk through the mud and water puddles. Muddy ground and standing puddles of water can cause the animals to become wet and soiled, which could have a negative impact on their health and well-being. A suitable method shall be provided to rapidly eliminate excess water.

To be corrected by: December 9, 2015.

Inspection and exit briefing conducted with the licensee and Kelly Maxwell, ACI.

Additional Inspectors

Maxwell Kelly, Animal Care Inspector
