FOREST PARK ZOOLOGICAL SOCIETY

Type: ROUTINE INSPECTION

Date: 02-AUG-2018

2.131(c)(1)

HANDLING OF ANIMALS.

While conducting this inspection it was noted that the barrier fences between an empty corn crib exhibit, the serval and the leopard enclosures were in need of attention. There are 2 -3 sections of 6' stockade fence that are positioned between these three exhibits. There are also 3' split rail barrier fences behind the stockade fence that run perpendicular to the 8' perimeter fence. However, there is an approximately 6' gap between the end of the stockade fence and the empty corn crib exhibit. And the 3' barrier fences behind the stockade fence are either in disrepair or the gates were not closed or locked. This large gap, and the opened gates, could allow a member of the general public direct access to the servals or leopard. To ensure the safety of the animals and the public this situation will need to be addressed.

***To Be Corrected By: August 2, 2018 COB for a temporary repair.

August 18, 2018 for a permanent repair.

3.75(c)(1)

REPEAT

HOUSING FACILITIES, GENERAL.

During the previous inspection (2/20/18) it was noted that the ceiling in the ring tailed lemur enclosure has small areas of bare sheet rock present. This has been corrected. However, during this inspection it was noted that a piece of trim, in this same enclosure, had been pulled away from the wall. There is now bare sheet rock exposed and there is a gap between the sheet rock and studs. This situation does not allow for the primate area to be readily cleaned or sanitized. This enclosure will need to be addressed.

3.80(a)(2)(iii)

PRIMARY ENCLOSURES.

Inspection Report

As we entered the keeper area of the ring tailed lemur enclosure it was noted that the door to the primary enclosure was not locked. It was also noted that there was primate feces on the window sill in the keeper area. Therefore, it appears that the lemurs were able to get out of their primary enclosure. Measures will need to be taken by the staff, to ensure that the primates are securely contained within this enclosure.

***To Be Corrected By: August 10, 2018

The exit briefing was conducted at the time of this inspection. This exit briefing was conducted with a representative of the licensee.
