3.127(d)

Facilities, outdoor.

The outside of the perimeter fence had an overgrowth of climbing woody plants in some areas. On the outside of the fence there were some tall trees that could be used as a bridge to go over the perimeter fence.

The perimeter fence should protect the animals in the facility and deter other animals and unauthorized persons from climbing the fence to have contact with the animals inside the facility which could potentially adversely impact their welfare. An overgrowth of plants on the fence can provide sheltered nesting areas for unwanted pests and affect the structural integrity of the fence.

Correct by September 30, 2024.

This inspection and exit interview was conducted with the Zoo Director.
