Type: ROUTINE INSPECTION
Date: 10-JAN-2024

3.130

Watering.

The water for the porcupine and the tayra had a green slime across the top indicating the water had not been changed in a while. Contaminated, dirty water could cause illness in the animals. Potable water must be provided as often as necessary for the health and comfort of the animal. All water receptacles shall be kept clean and sanitary.
Correct by: Jan 17, 2024

3.131(a)

Sanitation.

- The coati's enclosure had an accumulation of old food on top of the two nest boxes. The top of neither box appeared to have been cleaned recently. Both tops had an accumulation of grime ground into the wood.
 - The tayra enclosure had an accumulation of old food all over the bottom of the enclosure.
- Old food can become spoiled or attract flies and other pest which could cause illness in the animals. Enclosures shall be cleaned as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.
Correct by: Jan 23, 2024

This inspection and exit interview were conducted with the licensee.
