TAYLOR'S TRAVELING TROUP

Type: ROUTINE INSPECTION

Date: 04-MAR-2020

3.131(a)

SANITATION.

The cage containing 3 ferrets had a large amount of fecal material and debris present. The licensee stated it had been about three weeks since the cage was last cleaned. Enclosures with a buildup of fecal material and debris can create an environment for disease spread, contamination of the animals and excessive odors. The ferret enclosure must be cleaned and a more frequent schedule of cleaning established and maintained. Correct by March 16, 2020.

This inspection and exit interview were conducted with facility representative.
