ANTON HANTIG & FERDINAND HANTIG

Type: ROUTINE INSPECTION

Date: 19-APR-2016

3.125(a)

FACILITIES, GENERAL.

Tiger enclosure, Alaya:

- The press board panels covering an approximate 5 ft X 15 ft section of the top part of this enclosure were sagging and had several areas of chipping or flaking, wood pieces.
- The inside, wood floor of the den box was heavily worn with ragged, uneven edges. Also, on the outside and along the bottom part of this den box the wood has worn, discolored, and splintered edges.

Tiger enclosure, Dora:

- The top, wooden surface of the den box was heavily worn with uneven, ragged and splintered edges. There were also at least two exposed nail heads along the top surface of this den box.

All facility enclosures and structures within enclosures that are not maintained pose a risk of injury to the animals and can decrease the structural stability of the affected structures. The affected enclosure and structures must be repaired or replaced. Housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals securely.

Correct by 06/22/2016

3.131(c)

SANITATION.

The inside surfaces of a refrigerator used to thaw meat for the animals contained a buildup of dirt and dried blood in several areas. Also, the metal rack, shelves had a moderate accumulation of rust which prevents effective cleaning and sanitation.

Premises used to store food must be kept clean to protect and ensure the well-being of the animals and to facilitate good husbandry practices. A system of a more timely and efficient cleaning schedule must be in place.
