Type: ROUTINE INSPECTION  
Date: 28-MAY-2014

### 3.125(a)

#### FACILITIES, GENERAL.

\* The cheetah yards are enclosed with chain link fencing and a kick-in attached to the top of the fence. The kick ins are secured to the fences with lacing wire. The lacing wire was excessively rusted, deteriorated and missing in multiple areas. In the areas of missing wire the kick in was not attached to the top of the fence and was gaping with visible openings. The fence is not in good repair.

\* The metal doors and door frames in the coati mundi and red fox housing facilities are excessively rusted and deteriorating. The rusted areas are flaking and pieces of metal are missing. The deterioration has caused compromise of structural integrity.

Housing facilities must be structurally sound and kept in good repair to protect the animals and safely contain them. The above areas should be repaired or replaced.

Correct by: June 20, 2014.

The inspection and exit interview were conducted with management.
