JAYDENS JUNGLE EXOTIC PETS  
INC

Type: ROUTINE INSPECTION

Date: 17-NOV-2021

---

### 2.40(b)(2) Direct

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A prairie dog housed in an enclosure in the area behind the stairs is mildly squinting the left eye. The left eye is cloudy in the center, there is green discharge and crusts around the eye, and the eyelids are mildly red and swollen. The facility representative states that the problem occurred a few days ago and was worse initially, as the eye was completely closed, but that she is unsure if a vet was consulted about the problem. The attending veterinarian does not have a record of consultation for this incident. No treatments have been administered.

Problems that are not communicated in a timely manner to the attending veterinarian can lead to poor health and poor animal welfare.

Direct and timely communication of animal health problems must be conveyed to the attending veterinarian to ensure the health and well-being of the animal.

Corrected during inspection; facility representatives called the attending veterinary clinic and obtained a same day appointment.

## Inspection Report

---

**2.131(c)(1) Critical**

**Handling of animals.**

A bite incident occurred in early August at the facility. A member of the public was bitten by one of the prairie dogs, and approximately 1 month later, was hospitalized. When the bite occurred, the facility was alerted but a facility representative did not directly witness the incident.

Animals handled in a way that does not minimize the risk of harm to both the animal and the public can lead to serious injuries or health impacts of either the animal or the public. Correct by ensuring there is sufficient distance and/or barriers between the animal and the public to assure the safety of both. Corrected prior to inspection.

This inspection and exit interview were conducted with facility representatives.
