Facilities, general.

A male, Linneaus's two-toed sloth, Flash, sustained a nail injury by catching his nail in-between a double mesh barrier that separates him from the younger female sloth. He received veterinary care for the injury and the facility has taken measures to prevent any further injuries. Facilities that are constructed and designed inappropriately for the species contained can lead to injury of the animals. Correct by April 26, 2023 by ensuring all enclosures are constructed of materials appropriate for the animals involved and protect the animals from injury.

This inspection and exit interview were conducted with facility representatives.
