LESTER HOOVER

Type: ROUTINE INSPECTION
Date: 29-APR-2014

3.31(a)(1)

SANITATION.

Eleven of the twelve guinea pig enclosures had accumulations of excreta. These enclosures had more fecal material than bedding. Animals standing in fecal material are potentially exposed to parasites and diseases. Enclosures were last cleaned more than two weeks ago. Correct by ensuring that all primary enclosures are cleaned often enough to prevent an accumulation of excreta or debris and that enclosures are sanitized at least once every two weeks. Licensee must establish a program to keep enclosures clean.
Correct by April 30, 2014

An exit briefing was conducted with owner.
