Certificate: **56-C-0230**
Site: 001
KATHLEEN FUTRELL

Type: ROUTINE INSPECTION
Date: 25-AUG-2015

3.125(a)

FACILITIES, GENERAL.

There is a wooden visual barrier between two bears and the pool enclosure shared on alternate days with two tigers. The barrier consists of cedar planks attached over the chain link wall. Some of these boards are wet rotting at the bottoms and some board have been pulled off by the bears leaving slightly rough edges in places. The damaged boards need to be repaired or replaced to prevent any potential injuries. To be corrected by 9-18-15.

This is a focused inspection of items cited on last report and other specific parts of the zoo.

Exit interview conducted with facility representative.
