Customer ID: **2941**
Certificate: **35-C-0021**
Site: 001
DANE COUNTY

Type: ROUTINE INSPECTION
Date: 02-MAR-2023

3.125(a)

Facilities, general.

On 1/23/2023 a male capybara jumped into an empty pool. It was observed by keepers to have some scrapes and a full veterinary exam on 1/25/23 found abrasions but no serious injuries due to the incident. Review of the incident during inspection found that there is a single door between the primary winter holding and the outdoor holding with a drained pool. While some equipment was being moved out of the winter holding area by employees, the capybara darted out of the door into the outdoor enclosure area and then jumped into the empty pool. The construction of the enclosure with a single door between two holding areas did not safely contain the capybara from getting to the outdoor empty pool and getting injured. Ensure that the enclosure is maintained in a manner that protects the capybaras from injury and contains them away from pool when it is empty.

****Note:** The capybaras are not being housed in the affected enclosure at this time.

*****Correction:** Ensure to put in place corrections to prevent possible capybara access to the outdoor empty pool prior to placing capybaras into the affected enclosure area.

This inspection and exit interview were conducted with facility representatives.
