

## Inspection Report

Rhode Island Zoological Society  
1000 Elmwood Avenue  
Providence, RI 02907

Customer ID: 2245

Certificate: 15-C-0004

Site: 001

RHODE ISLAND ZOOLOGICAL SOCIETY

Type: ROUTINE INSPECTION

Date: 23-SEP-2014

### 3.50(a)

#### FACILITIES, GENERAL.

The building that is being used to house the NE Cottontail rabbits is in need of repair. The addition to this building had a water leak which damaged the ceiling and sheet rock. This damaged material has been removed. However, the area has not been repaired as of this date. To ensure the safety of these rabbits this area will need to be addressed.

\*\*\*To Be Corrected By: December 1, 2014

### 3.125

#### FACILITIES, GENERAL.

The Tropics building is in need of attention. Due to the high humidity and moisture that is ever present in this old building there are sections of the ceiling that have been damaged. There are areas of peeling / flaking paint present. There are also sections of the old plaster that have broken off the metal lathe. Due to the fact that there are free roaming primates, and a sloth, in this building that do have access to these areas, the building will need to be addressed.

\*\*\*To Be Corrected By: December 1, 2014

### 3.131(c)

#### SANITATION.

1. At the time of this inspection the North American porcupine was being housed in a stall, in the Bongo barn. The metal sliding door was noted to have an excessive accumulation of rust along the bottom 6 . The metal was flaking off in spots. Due to the fact that this animal was undergoing treatment, from the veterinary staff, it is necessary that all surfaces need to be maintained in good repair and in such condition as to facilitate the prescribed husbandry practices set forth in this regulation. Therefore, this door will need to be addressed.

Prepared By: JAN BALTRUSH, A C I USDA, APHIS, Animal Care

## Inspection Report

---

\*\*\*To Be Corrected By: October 31, 2014

2. The cement floor in the Commissary was also noted to be in need of attention. There are areas that have peeling paint and some areas with chunks of cement missing. This does not allow for the floor to be readily cleaned. Due to the fact that the majority of the diets, for the zoo collection, are prepared in this area, the floor will need to be addressed.

\*\*\*To Be Corrected By: April 1, 2015

An exit briefing was conducted with the licensee.
