Type: ROUTINE INSPECTION

Date: 11-APR-2016

### 3.125(a)

#### FACILITIES, GENERAL.

Inside the coatimundi enclosure, there is a high wooden platform where the animals climb to access their automatic water dispenser. This platform is wobbly and not fully secured to its base. This could cause unnecessary harm or injury to the animals housed therein. The platform must be adequately secured to maintain structural strength and to prevent injury to the animals. It is the facility's responsibility to ensure that the animals have safe and sturdy climbing structures within their primary enclosure.

TO BE CORRECTED BY: 11 May 2016

This inspection and exit interview were conducted by Ashley McIntosh (VMO), Karla Wills (ACI) and facility representative.
