Akron, NY 14001

Customer ID: **333902**  
Certificate: **21-C-0500**  
Site: 001  
Robert Humbert

Type: RE-LICENSE INSPECTION  
Date: 28-JUL-2025

---

### 3.125(b)

#### Facilities, general.

The shelter building for the coyote and foxes has no means of providing ventilation when the animals are secured in the building. There is no electricity to this building and the windows were closed and the door is not able to be opened due to containment concerns. The area was hot and stuffy when the door was opened as there was no fresh air circulating in the building. Ventilation needs to be addressed when animals are locked in this building to provide for their comfort and well being.

### 3.125(c)

#### Facilities, general.

Storage for perishable food supplies needs to be addressed. Currently apples and potatoes for the animals are stored out on a counter in the porcupine barn and due to heat and humidity are beginning to spoil and show signs of mold growth. Perishable food items need to be refrigerated to protect the food supplies from deteriorating and contamination.

### 3.127(c)

#### Facilities, outdoor.

The cavy enclosure was recently cleaned, but the outdoor pad is not draining, and water is pooling up in several areas of the enclosure. The water is pooling just outside the shift door where the cavy's must walk if they want to go outside. This enclosure needs to be addressed to ensure that excess water can be rapidly eliminated for the health of the animals.

### 3.131(a)

#### Sanitation.

The shelter for the bobcat needs to be cleaned. There was an accumulation of bones from previous feeds in the shelter area that has not been removed. These bones can contribute to pests in the area and should be removed and cleaned as often as necessary for the health of the animal.

### 3.131(c)

#### Sanitation.

Housekeeping needs to be addressed in the shelter area for the cavy's, crested porcupines, coati mundi and chinchilla's. This area is filled with miscellaneous items (hoses, tools around old food, excess wire and crate doors etc) haphazardly

## Inspection Report

---

left around the area and animal enclosures. This area needs to be kept clean to facilitate good housekeeping and husbandry practices around the animals.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within (2) more inspection(s) or by Sept 26, 2025 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
