COYOTE CONSULTING COMPANY INC

Type: ROUTINE INSPECTION

Date: 02-OCT-2019

3.131(a)

SANITATION.

Cleaning of Primary Enclosures.

**There were 9 adult male Yucatan pigs housed in one pen that was approximately 15' x 25' in size and the cleaning of the pen is done once a day in the late afternoon. At the time of the inspection (11:30 AM) the entire floor space of the pen was covered in a moist semi-solid mixture of fecal matter, urine, and saturated wooden shavings. There was no dry, unsoiled floor surface in the enclosure, the feet/lower legs of the pigs were soiled with some of the moist fecal mixture, and there was an unpleasant odor.

Per this Section of the Regulations, excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals, minimize disease hazards, and to reduce odors.

More frequent cleaning of the primary enclosure and/or housing fewer animals in this enclosure are indicated to prevent contamination, minimize disease hazards, and reduce odors.

Correct from this date 10/4/19 forward.

NOTE - Exit briefings held 10/2/19 on-site with facility representatives and on 10/4/19 by phone with the Licensee. Report delivered to Licensee by e-mail 10/4/19.
