3.11(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Premise.

***The outdoor facility had a pile of tires, rolled up fencing and other fencing supplies adjoining the enclosures with tall weeds (approximately 2-4 feet tall) growing among them. The food and bedding storage area for the outdoor facility had old open dog food (not used for kennels dogs) discarded feed bags and other clutter. The sheltered building floor had food and hair in the walkways. Waste, old food, weeds, and clutter can harbor insects, pests, and vermin. The insects, pests and vermin can bite and irritate the dogs, contaminate the environment, food and water, and increase the risk of potential disease to the dogs. The licensee must remove the waste, clutter and weeds and maintain them to prevent or eliminate breeding and living areas for rodents and other pests and vermin.

To be corrected by: 31 Oct 2016

This inspection and exit interview were conducted with licensee.
