Type: ROUTINE INSPECTION
Date: 06-AUG-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

2.40 (b)(2) The written program of veterinary care (PVC) reviewed and signed on 10/20/2014 calls for the one adult llama to receive annual CDT vaccination, fecal testing and Ivermectin annually. The twenty-three fallow deer are to have fecal testing annually. There were no records available at the time of the inspection showing that these procedures had been done. The facility representative stated that they are no longer giving Ivermectin annually to the llama. The written program of veterinary care does not reflect what is actually being provided to the animals. A complete and accurate PVC is important to ensure there is an understanding between the licensee and the attending veterinarian, so that all routine preventative care and treatments are accomplished to protect the health and well-being of the animals.

Establish and maintain an accurate and complete program of veterinary care that includes the use of appropriate methods to prevent, diagnosis and treat diseases and injuries.

To be corrected by: Next Inspection

3.125(a)

FACILITIES, GENERAL.

3.125 (a) The fence along the front in the upper enclosure housing 2 male fallow deer has several areas where it is no longer attached to the support poles. The fence is being pushed outward, brackets holding the fence to the support pole are no longer attached making this area not structurally sound and in good repair.

Indoor and outdoor facilities shall be structurally sound and maintained in good repair to protect the animals.

To be corrected by: August 20, 2015
