Site: 001
MCCLAIN LODGE LLC

Type: ROUTINE INSPECTION
Date: 28-SEP-2023

3.125(a)

Facilities, general.

Two primary enclosures were in poor repair.

- The outdoor wire fencing around the enclosure housing 15 goats and 5 sheep contained many sharp points pointing inwards towards the animals in the enclosure.

- The enclosure housing 24 prairie dogs failed to contain the animals. A prairie dog was observed 20 feet away from the primary enclosure, sticking its head out of a hole in the ground. The facility manager stated that the prairie dogs had tunneled out of the primary enclosure into adjacent enclosures.

Sharp edges and points in enclosures can lead to injury of the animals. Animals that escape their primary enclosures may experience stress, injury, predation or death. Correct by ensuring that the outdoor housing facilities are structurally sound and maintained in good repair to protect the animals from injury and to contain them.

CORRECT BY : 11/9/2023

3.131(d)

Repeat

Sanitation.

A large amount of rodent droppings were present in the animal food prep area, the shed where feed and medication is stored, and a live rat was present in the primary enclosure housing two adult male ring-tailed lemurs. Rodents can cause contamination and spoilage of feed, and rodents can carry diseases that are harmful to animals. Correct by establishing and maintaining a safe and effective program for the control of pests including rodents. The pest control program must also be maintained in accordance with 3.84(d).

3.154

Environment enhancement to promote psychological well-being.

At time of the inspection this facility has not documented a written plan for environmental enhancement for birds, although they do provide enrichment for the resident birds. Birds have complex social and environmental needs, and failure to provide for these needs may result in stress, obesity, or the development of abnormal/harmful behaviors. Dealers, exhibitors, and research facilities must develop, document, and follow an appropriate plan for environment enhancement. The plan must be approved by the attending veterinarian and must address the social needs of birds, their environment, and special considerations for young birds, birds showing signs of distress, and social birds housed alone.
