Certificate: **93-C-0702**
Site: 001
STAR ECO STATION

Type: ROUTINE INSPECTION
Date: 31-JAN-2017

2.131(b)(1) CRITICAL

HANDLING OF ANIMALS.

A 1.5 year old bobcat was found during morning checks, by keeper staff, tangled in her blankets. The medical report states the cat appeared to self-mutilate her left hind foot with loss of phalanges, in an effort to free herself. Records indicate the animal received immediate veterinary care and is healing well.

Enrichment items, furniture, bedding ,etc. provided in animal enclosures should be appropriate for the age and species to minimize the risk of entanglement/injury or stress to the animals.

Handling of all animals shall be done in a manner that does not cause trauma, behavioral stress, physical harm, or unnecessary discomfort. A system should be in place to ensure items in animal enclosures are appropriate for the age and species of animal.

The facility acted promptly to address this incident by conducting an investigation and implementing appropriate corrective actions to prevent future occurrences.

This item has been corrected by the facility.

This inspection and exit interview were conducted with the facility representative.
