Type: ROUTINE INSPECTION
Date: 30-JUL-2025

2.75(b)(1)

Records: Dealers and exhibitors.

Required records are absent for acquisition and disposition of some of the animals. The licensee states there are no records for 7 domestic chickens sold, 5 domestic goats sold and 7 domestic chicken purchased since October 2024. Full documentation of regulated animals is essential for proper identification, tracking of animals and for APHIS Officials to be able to carry out their duties. Facilities shall make and maintain complete records regarding the details of the acquisition and disposition of animals in their possession in order to account for all animal transfers or deaths and the sources of the animals. All information found within section 2.75(b)(1) should be recorded, maintained, and made available for inspection.

Correct from this date forward of 01 August 2025.

3.153(a)(1)(i)

Primary enclosures.

There are sharp points present in the multispecies outdoor aviary housing 15 domestic chickens, 6 domestic ducks, 2 Lady Amherst's pheasants, 2 vulturine guineafowl, and 1 helmeted guineafowl. A metal mesh fastened into a tube structure used to protect a plant was found on its side on the ground. The cut metal wires on either end of the tube felt sharp and were accessible to the ground dwelling birds. Failure to ensure that no sharp points are present in enclosures housing birds can result in injuries to the birds. The licensee must ensure that primary enclosures are constructed and designed so that they have no sharp points or edges that could injure the birds. Corrected at the time of inspection.

Correct from this date forward of 01 August 2025.

This inspection and exit interview were conducted with the licensee.
