Isaac and Aundria Tilden
3080 Hwy H
Grovespring, MO 65662

Customer ID: **600114**

Certificate: **43-A-6572**

Site: 001

001 - Isaac and Aundria Tilden

Type: ROUTINE INSPECTION

Date: 15-DEC-2021

3.4(b)

Outdoor housing facilities.

The shelters provided were not large enough for all dogs to sit, stand and lie in a normal manner. In two enclosures the one dog in the enclosure was taller and longer than the shelter provided and therefore the dog could not sit, stand and lie in a normal manner. In one enclosure the two dogs could not both occupy the shelter at the same time and be able to sit, stand and lie in a normal manner.

The availability of an appropriate shelter is necessary to ensure the health and well-being of the dogs.

The licensee must provide an appropriate shelter for all dogs. One that allows each animal to sit, stand and lie in a normal manner and provide adequate shelter from the elements.

Inspection Report

In one enclosure no potable water was available. There were two dogs in an enclosure with one water bucket that was about 10 inches deep. The bucket contained about 1 inch of a dark brown liquid that appeared to be muddy water.

Access to clean potable water is essential to the health and well being of the dogs.

The licensee must provide clean potable to the dogs on a continuously basis.

The issue was corrected during the inspection.

3.13(a)

Veterinary care for dogs.

Program of Veterinary Care presented at time of inspection did not mention that sampling and treatment of parasites (including fleas, worms, coccidia, giardia and heartworm) would be done nor did it include a schedule for the sampling. The Program of Veterinary Care did not mention any schedule of when preventative care and treatment (including eyes, ears, skin, teeth, hair coat and nails) would occur.

An appropriate Program of Veterinary Care must include scheduled sampling for parasites and scheduled preventative care to ensure the health and well-being of the dogs.

Each dealer must follow an appropriate program of veterinary care for dogs that includes a plan for the routine sampling of heartworm, intestinal parasites and ectoparasites. It must also include a schedule for preventative care. The licensee must add to have the dogs sampled for parasites with a schedule and a schedule for preventative care to the Program of Veterinary Care for Dogs.

Inspection Report

To be corrected by 12/31/2021

3.13(b)(3)

Veterinary care for dogs.

No record showing that vaccination for parvovirus or distemper was provided. The program of veterinary care states that all adult dogs will be vaccinated for parvovirus and distemper annually.

Following the program of veterinary care and keeping copies of medical records is necessary to ensure the health and well-being of the dogs.

Each dealer must follow an appropriate program of veterinary care for dogs and keep copies of medical records. These medical records must be available for APHIS inspection. The licensee must vaccinate all adult dogs for parvovirus and distemper and maintain medical records documenting the vaccinations.

To be corrected by 12/31/2021

This inspection and exit interview were conducted with facility representatives.
