Certificate: **57-C-0368**  
Site: 001  
ANIMAL ADVENTURES LTD

Type: ROUTINE INSPECTION  
Date: 11-OCT-2023

---

### 2.40(a)(1)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There was no written program of veterinary care for the birds maintained within the facility. A written program of veterinary care is needed to establish an adequate standard of veterinary care for the animals on hand. In coordination with the attending veterinarian, the facility must establish and document a program of veterinary care for the birds. Correct by 11/10/2023.

### 2.75(b)(1)

#### Records: Dealers and exhibitors.

The acquisition information for the chinchilla and the 2 birds were not documented. Without records which fully disclose the animal's acquisition information, legal and medical information traceback is not possible. Develop and maintain records disclosing the required acquisition information including the date, name, address, and USDA number if applicable of the person from whom the animal was acquired from. Correct by 10/31/2023.

### 3.125(a)

#### Facilities, general.

Much of the metal floor in the chinchilla enclosure was heavily stained with brownish/black material as well as rust. In the rabbits' enclosure, a large area of the dirt floor near the wooden litter box was stained black with small areas of fuzzy white material throughout. Stained surfaces such as these cannot be thoroughly cleaned or sanitized and could attract pest or create odors. The floor in both enclosures is in need of repair. Housing facilities must be maintained in good repair to protect the animals from injury. Correct by 11/10/2023.

### 3.154

#### Environment enhancement to promote psychological well-being.

The facility does not have a written environmental enhancement plan for the birds on hand. A written plan is necessary to ensure that the overall health, well-being, and psychological needs of the birds are being appropriately met. The facility must develop, document, and follow a species-appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and must address social grouping, environmental enrichment, special considerations, restraint devices, and exemptions. Correct by 11/10/2023.
