Type: ROUTINE INSPECTION
Date: 15-JUN-2021

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

No formal arrangements with an attending veterinarian could be produced during the inspection. Without formal arrangements with a veterinarian, there is no way to ensure that animals receive adequate medical care or that a veterinarian has appropriate authority to oversee or treat animals at the facility.

Correct by 6/25/21

2.40(b)(2)

Critical

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

An Aardvark in the interactive room is missing the tip of its tail. A purple coloration on the tail was a spray that the licensee used to attempt to prevent infection. The attending veterinarian had not been notified of the problem and therefore could not diagnose or treat it. Without adequate and proper medical care, injuries can become infected, further negatively affecting the animal and putting it at risk of more serious medical conditions.

Correct by 6/23/21

A young giraffe died recently at this facility. According to the licensee it died of a "twisted gut". There were no medical

records available for review to confirm this diagnosis. The attending veterinarian was unable to be contacted for confirmation because his/her information was never provided by the licensee.

A pygmy hippo was recently acquired by the licensee and died shortly after acquisition. When asked if the attending veterinarian was contacted about the animal before or after it's death, the licensee said no.

When animals die acutely and suspiciously, as seems to be the case with the giraffe and the hippo, the veterinarian should be notified. The veterinarian is responsible for ensuring the animals receive adequate veterinary care. Determining the cause of death can be important for the health of other animals at the facility.

2.75(b)(1)

Records: Dealers and exhibitors.

Records of acquisition and disposition for the following animals were not provided during this inspection:

Missing Acquisition Records:

1. Muntjac: 17 animals
2. Grey Kangaroo: 3 animals
3. Bennet Wallaby: 13 animals
4. Agile Wallaby: 2 animals
5. Capuchin: 10 animals
6. Patas Monkeys: 2 animals
7. Spider Monkeys: 4 animals
8. Mangabey: multiple animals
9. Ring-Tailed Lemur: 16 animals

14. Caracal: 1 animal
15. Asian Small Clawed Otters: 1 animal
16. Pygmy Hippo: 1 animal

Acquisition and disposition records are required so that animals being used in regulated activities can be accurately tracked to ensure their legal acquisition, proper care, and humane transportation. Animals transferred to or acquired from other licensees must have disposition and acquisition records containing all information required by the Animal Welfare Act Regulations available for inspection. This requirement applies to all regulated animals purchased or otherwise

acquired, owned, held, leased or otherwise in possession of or under control of the licensee, and all regulated animals transported, sold, euthanized, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

Correct by 7/1/21

3.75(a)

Housing facilities, general.

The enclosure housing three brown spider monkeys contained a wooden square den inside that is in disrepair and falling apart.

The housing structure in the lemur island display is made of wood that is sagging and showing signs of deterioration and disrepair.

Animals can become injured or killed if housed in a structure that is in disrepair of at risk of collapse.

Correct by 6/28/21

3.75(c)(3)

Housing facilities, general.

The interactive room which various species of lemur contained benches that were covered in a layer of dark organic material and excreta. Sections of the walls and climbing structures had a film of bedding dust and brown splashes of the same organic material. There is a risk of pests, disease and contamination of surfaces and food supply when adequate daily and spot cleaning are not provided.

Inspection Report

3.77(g)

Sheltered housing facilities.

The interactive room contains various species of adolescent lemurs that are allowed to have direct contact with the public. While the licensee states that there is a handler present in the room during this time, there is no direct control of the animals when they have contact with customers. There is a risk of direct injury to both the public and the animals in the interaction area. Animals must be under the direct control at all times during interactive sessions.

Correct by 6/23/21

3.125(a)

Facilities, general.

The enclosure containing 2 Fossas had sections of wooden branches used for enrichment that had come loose or fallen down, that had 1 to 2 inch screws sticking out of them. Animals may become injured if they come into contact with sharp points or objects and there is a risk of failure to the walkways if they are not kept structurally sound and in good repair.

Correct by 6/23/21

This inspection and exit interview were conducted with licensee.
