2.126(a) Critical

Access and inspection of records and property; submission of itineraries.

Two Veterinary Medical Officers arrived at the facility on 18 July, 2025 at 10:50 AM, called the licensee and left a voicemail as an authorized facility representative approached the gate. The facility representative came to the vehicle and acknowledged that this site had been sold last fall, but that the licensee was still living on the property. The inspector informed the facility representative that as the AWA license was still active and associated with this site, we planned to complete an unannounced inspection. The facility representative replied that since they no longer had a CA Department of Fish Wildlife permit there was no exhibition and no covered animals at the facility, so no inspection was needed. The inspectors explained that as the AWA license was still active, this was a routine unannounced inspection and asked "Are you refusing inspection?" and facility representative said "yes, I am refusing inspection", but then stepped away to consult legal representation. The facility representative returned to the vehicle and reiterated that she was refusing entry to the facility and inspection.

An exit interview confirming that the facility representative was refusing inspection was conducted.
