Site: 001
MARK TERRILL

Type: ROUTINE INSPECTION
Date: 24-JAN-2017

2.50(b)

TIME AND METHOD OF IDENTIFICATION.

***In the whelping portion of the facility, there were eleven unweaned puppies that had no form of identification. In the broker facility, there were ten puppies in mixed litters that had no identification attached to the dogs. Appropriate identification of dogs is necessary to meet record keeping requirements for inventory, disposition, transport, and healthcare documentation. The licensee must identify all puppies as required. Acceptable forms of identification include a microchip, a collar and tag, a plastic-type collar with the required information legibly written, or a cage card as long as all the puppies in the enclosure are from the same litter and in the breeding portion of the facility. To be corrected from this day January 24, 2017 forward.

This inspection began at 1002.

This inspection and exit interview were conducted with the facility representative.

End of report.
