GERALD WATTS

Type: ROUTINE INSPECTION
Date: 02-FEB-2015

3.6(a)(2)(1)

PRIMARY ENCLOSURES.

The kennel facility consists of one indoor housing building. In the animal holding area there are sets of raised wire enclosures along the east and west walls and also in the center of the room. In the row of enclosures along the eastern wall there are three enclosures, each containing one adult dog, which has broken wire flooring material. These broken wires could injure the contained animals. Primary enclosures must be repaired or replaced and maintained so that they have no sharp points or edges that could injure the contained dogs.

Affects three adult dogs.

Correct by February 16, 2015

The inspection and exit briefing was conducted with the facility Representative.
