Site: 001

LOST WORLD RANCH INC

Type: ROUTINE INSPECTION

Date: 23-AUG-2017

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Three camels on pasture with 17 other camels appear to be in thin body condition with no other observed clinical issues. The health status of these three camels has not been communicated to the attending veterinarian so that an evaluation and possible diagnosis can be made. Direct and frequent communication of any animal health problems needs to be conveyed to the attending veterinarian for the health and well being of the animals.

Correct by September 7, 2017.

3.131(a)

SANITATION.

The barn containing 2 adult female camels and 4 juvenile camels has an excessive accumulation of fresh feces and fecal material matted in the straw such that there was no available clean space for resting within the sheltered area. The outdoor paddock adjacent to the barn also has a substantial amount of fecal material covering the ground near the entrance to the barn. Areas housing animals need to be kept clean and free of fecal debris to minimize risk of disease and maintain the health of the animals.

Correct by August 25, 2017.

This inspection and exit interview were conducted with the facility representative.
