

## Inspection Report

---

Los Angeles Zoo  
5333 Zoo Drive  
Los Angeles, CA 90027

Customer ID: **3532**  
Certificate: **93-C-0043**  
Site: 001  
LOS ANGELES ZOO

Type: FOCUSED INSPECTION  
Date: 17-OCT-2023

---

### 3.150(e)

#### Facilities, general.

The flamingos and a covered mammal share a common storage area where salt and feed are stored for the flamingos, and bedding is kept for the mammal. There was an open bag of bedding being stored directly on the ground in this area with 3 rodent droppings next to the bag. Supplies of bedding, maintained in this manner may attract rodents and other pests to areas where supplies of feed, substrate, and bedding are stored, resulting in possible contamination. Supplies of food, bedding, and substrate must be stored in a manner that protects the supplies from deterioration, spoilage (harmful microbial growth), contamination, and vermin infestation. The supplies must be stored off the floor and away from the walls, to allow cleaning underneath and around the supplies.

Corrected at time of inspection on October 17, 2023

### 3.158(c)

#### Cleaning, sanitization, housekeeping, and pest control.

In one bird food preparation area, the filter of an active air conditioner had a mild to moderate buildup of dust and debris on and around the filter. Additionally, there were 2 ceiling vents identified in 2 other bird food preparation areas where a mild to moderate accumulation of dust was also present. These areas should be cleaned as often as needed to minimize a buildup of dust and debris, to protect the health and well-being of the birds. Premises where housing facilities are located, including buildings, surrounding grounds, and exhibit areas, must be kept clean to protect the birds from disease, to facilitate the husbandry practices required in this subpart.

To be corrected by October 27, 2023

This inspection and exit interview were conducted with the facility representative.

Additional Inspectors:

BONNIE BOONE, VETERINARY MEDICAL OFFICER
