Customer ID: 2295  
Certificate: 23-C-0082  
Site: 001

TERRANCE MATTIVE SR

Type: ROUTINE INSPECTION  
Date: 24-OCT-2017

### 3.80(a)(2)(ix)

#### PRIMARY ENCLOSURES.

\*\*\* The wood shelves and platforms in primate enclosures are not constructed in a manner that allows them to be readily cleaned and sanitized. These are wood platforms that have been treated but are not impervious to moisture. These hard surfaces must be spot cleaned daily and sanitized at least once every two weeks in accordance with regulations 3.84. Surfaces must be constructed in a manner that allows them to be readily cleaned and sanitized or replaced when worn. The surfaces for the non-human primates need to be addressed to facilitate cleaning for their health.

Correct by: Dec 1, 2017

### 3.84(d)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

\*\*\* There was evidence of mice along the back walls, on shelves and on top of a food container in a primate building. There were mice feces on top of the yellow food container lid that was cracked, potentially causing contamination to the primate diet. For the protection of the food supplies and the animals, an effective program for the control of pests must be established and maintained in this building.

Correct by: Oct 31, 2017

This inspection and exit interview were conducted with a facility representative.

#### Additional Inspectors

Neafsey Michael, Assistant Director

Prepared By: D AMBROSIO ANDREA, A C I USDA, APHIS, Animal Care

Date:
