Type: ROUTINE INSPECTION
Date: 10-MAR-2015

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

In the "Golden Shed" there is a male Golden Retriever (Grizzly, unable to obtain microchip number) that is holding his right, front leg up off the ground and walking on three legs. The right, front paw appears to be swollen and the dog was observed placing this paw on the ground but immediately picking it back up. This dog couldn't be caught for the inspector to have a closer look at the paw. Failure of the dog to bear weight on the leg can be a sign of injury and pain. This dog must be evaluated by a licensed veterinarian in order to ensure that an accurate diagnosis is obtained and an appropriate treatment plan is developed and followed. Diagnosis and treatment plan must be documented and available to inspector upon request.

Correction date: By 12:00pm on March 13, 2015

3.11(b)(2)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

In the "Golden Shed" all of the enclosures, containing fifteen dogs, have an excessive buildup of dirt and grime on the walls. This accumulation of dirt and grime could pose a health risk towards the dogs. All surfaces in used primary enclosures must be sanitized once every two weeks or more often if necessary to prevent a buildup of dirt, grime and any other disease hazards.

Correction date: March 25, 2015

Exit interview conducted with facility representative.
