Customer ID: **24532**
Certificate: **74-C-0749**
Site: 003
Mark Mills

Type: ROUTINE INSPECTION
Date: 24-JUL-2014

3.125(a)

FACILITIES, GENERAL.

Structural Strength

In the animal enclosure containing 12 sheep, 13 goats, one axis deer, and one llama, on the side of the shelter there is metal tin siding that is peeled away from the shelter structure exposing the sharp ends of the metal tin and gaps large enough for animals to get their hooves/foot caught and potentially cause injuries.

Maintain outdoor facilities so that it is structurally sound and good repair to protect animals from injury.

To be corrected by: August 23, 2014

3.130

WATERING.

In the animal enclosure containing 12 sheep, 13 goats, one axis deer, and one llama, the watering receptacles in this enclosure have an excess of green/brown material and dirt covering the inside of the watering receptacles. Dirty water may harbor disease hazards which may pose a health risk for the animals. All water receptacles shall be kept clean and sanitary.

To be corrected from this day forward.

Records were located at a different site and were not inspected.

Inspection and exit interview conducted by APHIS personnel with facility representative.
