Type: ROUTINE INSPECTION

Date: 20-APR-2017

2.40(b)(2) DIRECT REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

One female ring tailed lemur was injured in a fight with cage mates approximately one month ago resulting in a severe injury to her right hand. Her right hand is missing and there is exposed tissue at the end of her forearm with possible bone exposed. Employees stated that the animal received antibiotics weekly and the wound was treated with antibiotic cream. The lemur has not been examined by a veterinarian since the injury occurred.

This animal must be examined by a veterinarian to determine the best treatment for the exposed end of her arm.

Veterinary care was also an issue on the inspection conducted on 6/7/16.

CORRECT BY : 4/21/17

3.76(c)

INDOOR HOUSING FACILITIES.

The light is not working in the enclosure housing 7 squirrel monkeys.. It is too dark to visualize the animals or properly inspect the enclosure. A flashlight was used during the inspection. It is not possible to conduct proper cleaning or husbandry in an enclosure that has such poor lighting . Indoor housing facilities must be lighted well enough to permit routine inspection, cleaning and observation of the non human primates. The light must be repaired or replaced to maintain cleaning and husbandry.

CORRECT BY : 4/21/17

3.82(d) REPEAT

FEEDING.

The feeder for the squirrel monkeys housed inside is caked with old food and debris .

Allowing food and dirt to accumulate on feeders contaminates fresh food and may cause an illness. Food receptacles must be sanitized every 2 weeks or as often as necessary to provide for the health /well being of the animals . This was also an issue on the inspection conducted on 10/18/16

Prepared By: PANNILL ELIZABETH, D V M USDA, APHIS, Animal Care

Inspection Report

3.84(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The perches for the squirrel monkeys housed inside are black and caked with body oil and debris. Allowing dirt and debris to accumulate to such an extent poses a health hazard for the animals. Perches must be kept clean and replace when worn to maintain husbandry standard and a healthy environment for the animals.

CORRECT BY : 4/25/17

The inspection was conducted with facility employees. The exit briefing was conducted with the owner and the employees.
