Type: ROUTINE INSPECTION
Date: 15-AUG-2017

2.75(a)(1)

RECORDS: DEALERS AND EXHIBITORS.

Several animals were acquired since the last inspection. The records of acquisition for the new zebu and five sheep need to be obtained and made available for the next inspection. The disposition of the two sheep that were sold also needs to be made available on the next inspection.

Correct by: 08-30-2017

3.54(a) DIRECT

FEEDING.

At the time of this inspection there were five rabbits in one enclosure and two singularly housed rabbits that did not have feed in their feed receptacles. One rabbit had no feed receptacle in it's enclosure. When offered food all ate greedily. Rabbits shall be fed at least once each day.

Corrected at time of the inspection.

3.54(b)

FEEDING.

Several of the metal feeders had caking of the feed. These feeders need to be cleaned and sanitized and fresh food provided. All food receptacles shall be kept clean and sanitized at least once every 2 weeks.

Correct by: 08-17-2017.

3.55 DIRECT

WATERING.

At time of this inspection there was one very young rabbit found dead in it's enclosure. One other litter mate was

Inspection Report

still alive. I asked the licensee to add a bowl of water in it's enclosure as I feared it couldn't or didn't know how to use the automatic water system. When offered water, the young rabbit drank greedily and for long periods of time. It would rest and then resume drinking several more times throughout my inspection of the area. Young rabbits need to be offered water in an accessible receptacle if the licensee does not see them actively drinking from the watering system.

Corrected at time of the inspection.

3.56(a)(3)

SANITATION.

The catch pans for the wire mesh cages for the rabbits on the top row were excessively full of feces and urine. The ground under the lower cages were also covered in excessive amounts of feces. If primary enclosures are equipped with wire or mesh floors, the troughs or pans under such enclosures shall be cleaned at least once each week.

Failure to clean the trays and ground become a haven for insects and mammalian pests.

Correct by: 08-17-2017.

This inspection and exit interview were conducted with the licensee.
