GAP FARM

Type: ROUTINE INSPECTION

Date: 11-JAN-2024

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The current animal pharmacy area is stocked with a large supply of varied medications. Some are missing labels or the label has been worn away; some medications are expired however it is unclear whether they are in use. Two medications that are currently being used for the specific treatment of individual animals have labels from the veterinarian, however the date on the prescription label is incomplete.

Incomplete or unclear labeling of medications and/or the use of expired medications could lead to ineffective prevention and treatment of disease and potential harm to an animal. Correct by using appropriate methods to prevent, control and treat disease – including organization and labeling of medications to ensure the accuracy and efficacy of these methods. Correct by February 29, 2024.

3.154

Environment enhancement to promote psychological well-being.

The facility does not have an environmental enhancement plan for birds. An environmental enhancement plan must be developed, documented, and approved by the attending veterinarian so as to promote the health and psychological well-being of birds.

Correct by ensuring that a complete, documented plan for environmental enhancement, that addresses the required elements and is approved by the attending veterinarian, is maintained and available for inspection. Correct by March 31, 2024.

This inspection and exit interview were conducted with a facility representative.
