#### Facilities, general.

In the corner an outdoor enclosure housing two adult Indian Crested Porcupines there is an area on the ground where wire panels are exposed and not covered by dirt. The affected area is approximately 2 feet in diameter. Wire panels that are partly exposed and partly embedded in the earth may entrap animals' limbs or other body parts, resulting in stress, injury, or harm. Correct by housing animals in enclosures that are structurally sound and maintained in good repair to protect the animals from injury and contain the animals.

This inspection was conducted with the Director and the Attending Veterinarian. The exit interview was conducted with the Attending Veterinarian, consulting veterinarians, owner, Director, and facility personnel.
