RECORDS: DEALERS AND EXHIBITORS.

There are several puppy records that are missing the dates sold on the record sheets required for record management. The Disposition 7006 forms are missing the name and address information on the commercial shipper area of the record forms, and color descriptions of animals sold.

It is important to keep complete and accurate records for proper management and traceability of the regulated animals.

The licensee must include all dates of disposition of animals sold, transferred, donated, died or euthanized on the Puppy Records for traceability of the animals. All Disposition records should be filled out completely with full names and addresses of transport companies, and descriptions of animals sold.

3.6(a)

PRIMARY ENCLOSURES.

In pens 2 and 6 on the north side of back yard kennel that have flooring that needs to be secured together where 2 floor sections come together. The floor sections have a 1/2 inch to 1 inch gap when stepped on that pulls them apart where a dogs toes or foot could get caught. There are 3 primary enclosures in the whelping building that have wire patches over existing repairs on the floors where the pointed wire ends are protruding into the enclosure.

Holes or gaps in the floor or pointed wires can be a source of possible injuries to the regulated animals.

The licensee must repair/replace any holes or gaps in the flooring and cut off any protruding wire ends that can come in contact with the regulated animals.

Inspection Report

Inspection conducted with facility representative and exit interview done with licensee.

The inspector completed this inspection report when Animal Care was transitioning to a new information management system. Because the inspector re-typed the inspection report into the new system when it was deployed, the "prepared by" date on this inspection report is different than the date the inspector prepared the original inspection report, which occurred on August 16, 2016.
