Environment enhancement to promote psychological well-being.

Although the facility does have an enrichment schedule in place for each of their avian species that provides appropriate enrichment within the enclosures, the facility did not have a documented environmental enhancement plan to promote psychological well-being of their avian species as required. The facility must develop, document and follow a species appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian, and at a minimum must address social grouping, environmental enrichment, special considerations, restraint, and exemptions to the plan.

Correct by 9/14/23

This inspection and exit interview were conducted with a facility representative.
