Kindness Ranch
854 State Highway 270
HARTVILLE, WY 82215

Customer ID: **321630**
Certificate: **83-C-0006**
Site: 001
Kindness Ranch

Type: ROUTINE INSPECTION
Date: 19-JUL-2022

3.6(a)(2)(i)

Primary enclosures.

In the outdoor runs of both Dog 1 and Dog 2, there is chicken wire along the gate that is rusted and broken with sharp points that the dogs can access.

Sharp points can cause injury to the dogs. Primary enclosures must be constructed and maintained so that they have no sharp points or edges that could injure the dogs.

To be corrected by July 26th, 2022.

3.11(c)

Cleaning, sanitization, housekeeping, and pest control.

In the outdoor area for the cats, there are thick weeds growing along the fence and around play structures.

Thick weeds and grasses can make it difficult to clean, manage pests, and maintain enclosures in good repair. The facility must control weeds, grasses, and bushes to facilitate cleaning of the premises and pest control, and to protect the health and well-being of the animals.

To be corrected by August 2, 2022.

3.53(a)(1)

Primary enclosures.

Inspection Report

In an enclosure housing three rabbits, there is a broken metal bracket on the wall. The edges of this broken bracket are sharp and within reach of the rabbits in the enclosure.

Sharp points can cause injury to the animals. Primary enclosures for rabbits shall be structurally sound and maintained in good repair to protect the rabbits from injury, to contain them, and to keep predators out.

To be corrected by July 26th, 2022.

3.125(a)

Repeat

Facilities, general.

In an enclosure housing the two pigs, "Sally" and "Ernie", there is a post with nail heads sticking out of it. There are also multiple screw tips pointing into the enclosure where the pigs can reach them.

In an enclosure housing the two pigs, "Delilah" and "Daphne", there is a nail head protruding from the heated shelter in the barn as well as two large screw heads protruding from the wall inside the barn. There are numerous wire ties with sharp points in the outdoor area of the enclosure.

In the barn enclosure for the three sheep, there are three screw heads protruding from the wall next to the hay bin.

In the outdoor enclosure for the pig, "Martha", there are multiple wire ties and wire fencing ends with sharp points.

In an enclosure housing six cows and four llamas, there are numerous wire ties that have sharp points sticking in where the animals can reach them as well as two corral panels laying on the ground.

Sharp points and debris on the ground can cause injury to the animals. All enclosures shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

3.131(c)

Sanitation.

There is an accumulation of equipment, trash, and other items around the entrance to the barn and inside the barn kitchen. The items outside the barn are collecting water and making it difficult to control weeds along the enclosure for

Inspection Report

four pigs. The accumulation of trash, chemicals, and bins inside the barn kitchen makes it difficult to keep the area clean which is attracting flies.

Accumulations of trash and other unnecessary items can negatively impact maintenance and cleaning of the facility and contribute to pest issues. The premises shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart. Accumulations of trash shall be placed in designated areas and cleared as necessary to protect the health of the animals.

To be corrected by August 2nd, 2022.

3.131(d)

Repeat

Sanitation.

A large number of flies are inside the barn kitchen which is used to store and prepare food for the animals. These flies are inside an open box of apples, inside the trash, and on feed that has been spilled on the ground.

There are numerous flies on the adult cows out in the pasture. The cows are repeatedly flicking their tails, swinging their heads, and stamping their feet to remove flies.

Flies can contaminate food and cause discomfort to animals. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.

This inspection and exit interview were conducted with facility representatives.
