Certificate: **57-C-0323**  
Site: 001  
DOGWORKS INC

Type: RE-LICENSE INSPECTION  
Date: 12-JUL-2022

---

### 2.40(a)

#### **Attending veterinarian and adequate veterinary care (dealers and exhibitors).**

The facility did not have a current written program of veterinary care which covers the care for the goats, sheep, cow, alpacas, and rabbits present at the facility. A completed written program of veterinary care is important for the care of the animals and ensures clear and accurate communication between the facility and the attending vet. The facility must employ an attending veterinarian under formal arrangements. The formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises.

Per the licensee, the facility's attending veterinarian only cares for the dogs but does not have authority over the care of the aforementioned animals. In addition, deworming protocols are being carried out for the hoofstock animals that have not been approved by the attending veterinarian. When the attending veterinarian is not given the appropriate authority, the provision of veterinary care may be inadequate or inappropriate. The facility must assure that the attending veterinarian has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

To be corrected by July 29th, 2022

## Inspection Report

---

### 2.40(b)(2)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

Most of the medications maintained at the facility, mainly dewormers that are currently in use, were past their expiration date. Expired medications may lose functionality or could become detrimental to the health of the animals. The facility must ensure that all medications are being used in a manner that is consistent with providing adequate veterinary care to prevent, control and treat diseases or injuries. To be corrected by July 15th, 2022.

### 3.8

#### Exercise for dogs.

The exercise plan for the dogs was signed by the former attending veterinarian and has not been approved by the facility's current veterinarian. An exercise plan is a regulatory requirement to ensure dogs are given the proper exercise for their physical and psychological well-being. The facility must document and follow an appropriate exercise plan that has been approved by the attending veterinarian. To be corrected by July 29th, 2022.

### 3.13(a)

#### Veterinary care for dogs.

The facility had a mobile veterinarian visit the facility recently to perform the required yearly visit and physical exams for the dogs. Per the licensee, the current written program of veterinary care for the dogs was developed with and signed by the mobile veterinarian instead of the facility's chosen attending veterinarian. A written Program of Veterinary Care is necessary to help safeguard the welfare of the animals by designating a veterinarian with the authority and responsibility of overseeing all aspects of care, and on-going communication regarding any possible medical issues that arise. The facility must follow an appropriate program of veterinary care for dogs that is developed, documented in writing, and signed by the attending veterinarian. To be corrected by July 15th, 2022.
