3.154

Environment enhancement to promote psychological well-being.

A written environment enhancement plan has not been established to promote the psychological wellbeing for the birds. Failure to establish and maintain a plan for environment enhancement can result in the behavioral, social, and psychological needs of the birds not being met. The plan must address at a minimum social grouping, environment enrichment, special considerations, restraint devices, and any birds that are exempted by the attending veterinarian because of health issues or other conditions. The plan must be approved by the attending veterinarian. The facility must establish and maintain an environment enhancement plan for the birds. To be corrected by April 15, 2025.

This inspection and exit interview were conducted with facility representatives.
