FACILITIES, GENERAL.

Fallen trees have damaged top rails, posts and fence fabric in the following locations throughout the enclosure:

1. ENCLOSURE FENCE IN THE FRONT, NEAR THE ROAD

* A tree fell on the fence thus breaking the top and center rails and crushed the fence fabric.

2. THE CENTER DIVIDING FENCE FOR THE WHITE-TAILED DEER

* A 16 foot section of this fence has a bent top rail with leaning fence posts.

* A 24 foot section of this fence is severely damaged with several broken top rails, leaning posts and crushed fence fabric.

3. A SECTION OF THE MAIN FENCE, ALONG THE REAR OF THE ENCLOSURE, ADJACENT TO THE SLIP ROAD

* A two foot section of fence fabric has detached from the top rail and is no longer secured.

Damaged fence should be repaired and/or replaced to maintain structural strength, contain the deer and to prevent injury.
